G. A. Zavarzin, E. Stackebrandt, and R. G. E. Murray A correlation of phylogenetic diversity in the *Proteobacteria* with the influences of ecological forces 1

ARTICLES

Ryuji Yamaguchi, Kazuhiro Matsuo, Akihiro Yamazaki, Hiroaki Kagawa, Sadamu Nagai, and Takeshi Yamada Fusion protein based epitope mapping of the MPB57 protein from *Mycobacterium bovis* BCG and its epitope insertion into the native protein 7

Jagroop S. Dahiya Xylitol production by *Petromyces albertensis* grown on medium containing D-xylose 14

Kyong Bin Park and Ronald G. Labbé Purification and characterization of intracellular proteases of *Clostridium perfringens* type A 19

Jacqueline Fletcher and Chandi Wijetunga Serological characterization of surface proteins of *Spiroplasma citri* 28

C. R. Bell and W. D. Ramey Hybrid biovars of *Agrobacterium* species isolated from conifer roots 34

M. E. Leggett, K. Sivasithamparam, and M. J. McFarlane Effect of nitrogen supply on the rhizosphere interactions and take-all disease of wheat 42

Robert E. Zdor and Steven G. Pueppke Nodulation competitiveness of Tn*5*-induced mutants of *Rhizobium fredii* USDA208 that are altered in motility and extracellular polysaccharide production 52

M. Musharraf Ashraf, Zia U. Ahmed, and David A. Sack Unusual association of a plasmid with nalidixic acid resistance in an epidemic strain of *Shigella dysenteriae* type 1 from Asia 59

Yvon Letarte et Bernadette Pinel-Alloul Variations spatio-temporelles de l'abondance et de la production du bactérioplancton dans un lac humique du Bouclier canadien 64

Francisco Gonzalez, Antonio Vargas, Jose M. Arias, and Enrique Montoya Phosphatase activity during development cycle of *Myxococcus xanthus* 74

Saswati Bhattacharyya, B. K. Chakrabarty, A. Das, P. N. Kundu, and P. C. Banerjee *Acidiphilium symbioticum* sp.nov., an acidophilic heterotrophic bacterium from *Thiobacillus ferrooxidans* cultures isolated from Indian mines 78

Ing-Kae Wang, C. Reeves, and G. M. Gaucher Isolation and sequencing of a genomic DNA clone containing the 3′ terminus of the 6-methylsalicylic acid polyketide synthetase gene of *Penicillium urticae* 86
